PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on project experience building secure and scalable web applications using Spring Boot and React.js. Strong knowledge of REST API development, JWT-based authentication, role-based authorization, and layered architecture (Controller–Service–Repository). Proficient in OOP, multithreading, and database design. Passionate about writing clean, efficient, and maintainable code.

TECHNICAL SKILLS

Languages	Java, C#, JavaScript, C, C++
Backend	Spring Boot, REST APIs, Spring Security (JWT), JPA/Hibernate, MVC
Frontend	React.js, HTML5, CSS3
Databases	MySQL, MongoDB, SQL, Database Design
DevOps & Tools	Git, GitHub, Docker, Postman, Jenkins, Kubernetes
Concepts	OOP, Multithreading, Data Structures & Algorithms, Exception Handling, Agile, SDLC, CI/CD

EDUCATION

PG-DAC (Post Graduate Diploma in Advanced Computing) 2025

IACSD, Akurdi, Pune · Percentage: 87.38%

B.E. in Electronics and Telecommunication 2020 – 2024

Savitribai Phule Pune University · CGPA: 8.55

PROJECTS

LearnSphere – Full Stack E-Learning Platform GitHub Repository

Tech Stack : *Java, Spring Boot, Spring Security, JWT, React.js, MySQL, Docker, Postman*

- Designed and developed a full-stack web application using Spring Boot and React.js.
- Built 20+ RESTful APIs for user management, course management, quizzes, and certificate generation.
- Implemented JWT-based authentication and role-based authorization supporting 2 user roles (Admin and User).
- Secured 15+ API endpoints using Spring Security and JWT token validation.
- Integrated MySQL for persistent storage and containerized the application using Docker.
- Designed 8+ database entities using JPA/Hibernate and MySQL following layered architecture principles.
- Tested APIs using Postman and ensured proper exception handling and input validation.

Warehouse Inventory Tracker – Event-Based System GitHub Repository

Tech Stack : *Java, Spring Boot, React.js, Collections Framework, Multithreading, REST APIs*

- Developed a real-time inventory tracking system using Spring Boot and React.js.
- Managed concurrent inventory operations using synchronized multithreading for thread-safe stock updates.
- Applied Observer Design Pattern to automatically trigger low-stock alerts below threshold.
- Built REST APIs for product addition, shipment updates, order processing, and stock monitoring.
- Used Java Collections for efficient in-memory data handling with file-based persistence.

CERTIFICATIONS

- CDAC – PG-DAC (Advanced Computing), 2025
- Full Stack Java Development – Firstbit Solutions, 2024
- C/C++ Programming – PB Tech Solutions, 2023
- Employability Skill Development Program – RPG Foundation (Zensar), July 2023

ACHIEVEMENTS

- Achieved 87.38% in CDAC PG-DAC and secured 79% in the CDAC Common Campus Exam (CCE).
- Built and deployed 2 full-stack apps with 25+ REST APIs
- Maintained CGPA of 8.55 in B.E. Electronics Telecommunication.
