Professional Summary

Java Full Stack Developer with hands-on experience in building secure and scalable web applications using Spring Boot and React.js. Strong knowledge of REST API development, JWT-based authentication, role-based authorization, and layered architecture (Controller–Service–Repository). Proficient in OOP, multithreading, and database design. Passionate about writing clean, efficient, and maintainable code.

Technical Skills

Languages: Java (Core & Advanced), C#, JavaScript, C, C++
Backend: Spring Boot, REST APIs, Spring Security (JWT), JPA/Hibernate, MVC Architecture
Frontend: React.js, HTML5, CSS3
Databases: MySQL, MongoDB
DevOps & Tools: Git, GitHub, Docker (Basic), Jenkins (Basic), Kubernetes (Basic), Postman
Concepts: OOPS, Multithreading, Exception Handling, Agile, SDLC, CI/CD Basics

Education

PG-DAC (Post Graduate Diploma in Advanced Computing) 2025
IACSD, Akurdi, Pune Percentage: 87.38%

B.E. in Electronics and Telecommunication 2020 – 2024
Savitribai Phule Pune University CGPA: 8.55

Projects

LearnSphere – Full Stack E-Learning Platform

- Designed and developed a full-stack web application using Spring Boot and React.js.
- Built 20+ RESTful APIs for user management, course management, quizzes, and certificate generation.
- Implemented JWT-based authentication and role-based authorization (Admin/User) using Spring Security.
- Applied layered architecture (Controller, Service, Repository) with JPA/Hibernate for database operations.
- Integrated MySQL for persistent storage and containerized the application using Docker.
- Tested APIs using Postman and ensured proper exception handling and validation.

Warehouse Inventory Tracker – Event-Based System

- Developed a real-time inventory tracking system using Spring Boot and React.js.
- Implemented multithreading with synchronization to handle concurrent inventory updates.
- Applied Observer Design Pattern to automatically trigger alerts when stock falls below threshold.
- Built REST APIs to support product addition, shipment updates, order processing, and stock monitoring.
- Used Java Collections for efficient data handling and implemented file-based persistence.

Certifications

- CDAC – PG-DAC (Advanced Computing), 2025
- Full Stack Java Development – Firstbit Solutions, 2024
- C/C++ Programming – PB Tech Solutions, 2023

Achievements

- Ranked among top performers in the CDAC PG-DAC program.
- Actively solving Data Structures and Algorithms problems to strengthen problem-solving skills.
